WATER-BORNE POLYURETHANE  
PAINTS FOR EXTERIOR DOORS  
AND WINDOW FRAMES

# Flawless appearance even in demanding conditions

PINJADUR PRODUCT FAMILY IS FOR PAINTING EXTERIOR DOORS AND WINDOW FRAMES.

## Surfaces that stay looking good.

Pinjadur family provides outstanding gloss and color retention in even the toughest of climates (tested according to the EN 927), and the paints can be tinted to any color. Paints in this range have very low water permeability when exposed to weathering, making them an excellent choice for exterior doors and windows.

Pinjadur 30 forms an easy-to-clean, non-chalking surface. It repels dirt, helping the coating to retain its color and appearance. Tight, even paint film protects the surface also from issues like resin and knot bleeding. Both the primer and top coat can be cured at room temperature or in an oven, resulting in a more efficient painting process.

### PAINT SYSTEM WW75

TREATMENT	PRODUCT	APPLICATION	AMOUNT WET FILM G/M <sup>2</sup>
Priming	1-2 x Pinjadur Primer	Spraying	100-150
Topcoating	1 x Pinjadur 30	Spraying	80-150
